

The Possibilities are Endless....

For more than 20 years, our slings have been the premier rigging solutions for heavy lifts.

With overload tell-tails, fiber optics, and Check-Fast[®] inspection systems, we offer our rigging customers the most advanced means of inspecting their Twin-Path[®] slings at the job site. Our durable K-Spec[®] fiber is available in all our synthetic products. And we offer engineered protection for our synthetic slings with CornerMax[®] Pads and sleeves.

In addition to our synthetic products, we have three multi-part wire rope sling designs that achieve over 90% efficiency making them truly high performance wire rope slings. They are flexible and can be made to precise lengths.

All of this is backed up by the most extensive sling testing in our industry, a worldwide network of 40 sling fabrication locations, and a commitment to provide the highest quality rigging solutions for our customers.

Contact us for more information or to find your local Slingmax[®] Rigging Solutions dealer in 60 locations worldwide.
